

I am extremely opposed to any measures that allow such consolidation of the media that one organization can have a monopoly over the information available to the public. It is important that in a democracy all people obtain unbiased information and reporting. This cannot be done when one employer or organization controls many venues. It is imperative that not one or two businesses control multiple media sources in one market and it is important that the FCC do all it can to ensure many opposing points of view are readily available. Thus, I ask that you block the passage of the measures that allow for increased consolidation.
